

"Keeping you financially fit for retirement prosperity"

Absa Retirement Annuity Fund: Core Portfolio

31 July 2015

Fund objectives

The Absa Retirement Annuity Fund: Core Portfolio (the "Core Retirement Annuity") is a uniquely designed low cost retirement annuity ("RA") solution, based on so-called life stage investment philosophy. Life stage investing is based on the observation that investor's risk appetite generally declines as they near their retirement date. In the Core Retirement Annuity, your exposure to risky assets is automatically reduced as you near retirement (visit <http://etfcib.absa.co.za> for more details about the investment methodology).

The Core Retirement Annuity provides diversified exposure to various asset classes (domestic and international equity, property, fixed income and cash), subject to overall limits imposed by Regulation 28 of the Pension Funds Act. The portfolio is composed utilising passive building blocks (exchange traded funds) to ensure low investment costs. The portfolio is rebalanced every six months.

* For detailed holdings see Fund holdings per years to retirement category on the next page.

Fund features

Inception date: 13 March 2014

Simplicity and convenience: Your portfolio is automatically adjusted each year so that your risk reduces closer to retirement.

Easy to transact and manage: Simple online application process, investment tools, statements on demand, and recommended annual investment reviews.

Life stage model: Automatic investment risk adjustment based on time to retirement.

Low investment costs: Portfolio building blocks comprise low-cost passive investments (exchange traded funds).

Full transparency as to where your money is invested.

Tax benefits: Your contributions to a RA are tax deductible by up to 15% of your non-pensionable income.

During the term of the investment, the return on investment earned on your RA is tax-free and at retirement a significant portion of the cash lump sum may be tax-free.

Minimum investment amount

Lump sum investment:	R 10 000
Recurring investment:	R 500 per month
Additional lump-sum investment:	R 5 000

Fees and total expense ratio (incl. VAT)

Annual administration fee	0.228%
Consolidated total expense Ratio (TER) of underlying funds:	0.28%-0.33%
Total	0.50%-0.56%

(see figure 3 for TERs per years to retirement category)

The annual administration fee is calculated on the market value of the units held in the fund. Any financial advisor initial and annual review fees are negotiable between you and your financial advisor, if applicable.

This product aims to offer you a low cost retirement annuity and the fees are well below the industry average.

Performance

Please refer to your latest client statement for your individual performance. The below table is a performance summary per years to retirement category.

Figure 2

Investment Period	Years to Retirement							
	35+	30-35	25-30	20-25	15-20	10-15	5-10	0-5
1-month	1.91%	1.91%	1.91%	1.91%	1.86%	1.85%	1.79%	1.46%
3-month	-2.89%	-2.89%	-2.89%	-2.89%	-2.68%	-2.49%	-1.83%	-0.89%
6-month	2.61%	2.61%	2.61%	2.61%	2.45%	2.28%	2.20%	2.41%
1 Year	7.64%	7.64%	7.64%	7.64%	7.97%	7.65%	7.60%	7.77%
3 Year*	17.06%	17.06%	17.06%	17.06%	16.37%	15.40%	13.06%	11.16%
5 Year*	15.24%	15.24%	15.24%	15.24%	15.05%	14.25%	12.65%	11.05%

Source: Absa CIB, 31 January 2015

Notes:

Please note: Due to the price of each underlying ETFs making up the asset allocation being priced as full units, smaller investments may not achieve the targeted asset allocation in the first few months of the investment. The remaining cash will be placed in the cash account until it is sufficient to purchase additional full units.

- The consolidated total expense ratio (TER) is a measure of the weighted average total expense ratios of the ETFs that make up each years to retirement category. The TER is a measure of the ETFs assets that have been sacrificed as payment for services rendered (allowable charges per prescribed industry standards) in the management of the ETF(the TER excludes brokerage and transactional costs), expressed as a percentage of the daily average value of the portfolio and calculated over a 12 month rolling period. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
